

monarch **E**

EARLY BREAST CANCER

DO YOU HAVE EARLY STAGE BREAST CANCER?

- Have you been diagnosed with hormone receptor positive, HER2 negative early breast cancer?
- Have you recently undergone or are you scheduled to undergo surgery for your breast cancer?

If so, **you may be eligible to take part in a new clinical research study** below is an overview for eligible participants:

- Receive standard of care endocrine therapy
- Attend regular study visits to monitor your health
- Study visits will occur at a local research center
- Continue to see primary Oncologist and other breast cancer support team members
- Some participants may also receive an investigational drug in addition to the endocrine therapy

Your primary Oncologist and other breast cancer support team members may download the **HCP Studies™** mobile platform for easy access to study information and to contact the study team directly (**iTunes/App Store** or **Google Play Store** and search for **HCP Studies™**).
